

C18040 & C18041 Installation Procedure

1. Remove the center capscrew using a 3/16" Allen key.
2. Place one half of the switch bracket on each side of the transmission shifter
3. Loosely install the center capscrew.
4. Orientate the switch in the bracket for desired position (on/off) and adjust the height of the bracket for the drivers convenience.
5. Torque the capscrew to 50 in-lbs.

Consult the diagrams below for the correct wiring connections:
